

- **MILLER GASKET...
DIE AND LASER CUTTING
AND GASKET FABRICATING
SINCE 1961**

- **INNOVATIVE SHORT, MEDIUM AND LONG-RUN DIE AND LASER CUTTING SOLUTIONS FOR OVER 40 YEARS**

Miller Gasket, formally known as JMiller Co. was founded in 1961 to serve industry with high-quality custom and precision die-cut parts and services.

The knowledge and experience of our dedicated staff and management combined with our innovative and quality-driven philosophy, helps us differentiate ourselves from our competitors in the marketplace.

Our state-of-the-art manufacturing plant located in Southern California is well equipped to meet and exceed all of your die and laser-cut part and product needs.

- **THE FUTURE AND OUR RESPONSE**

We at Miller Gasket will continue to seek out and invest in production enhancing and quality improving technology both on the plant floor and in all other areas of our business.

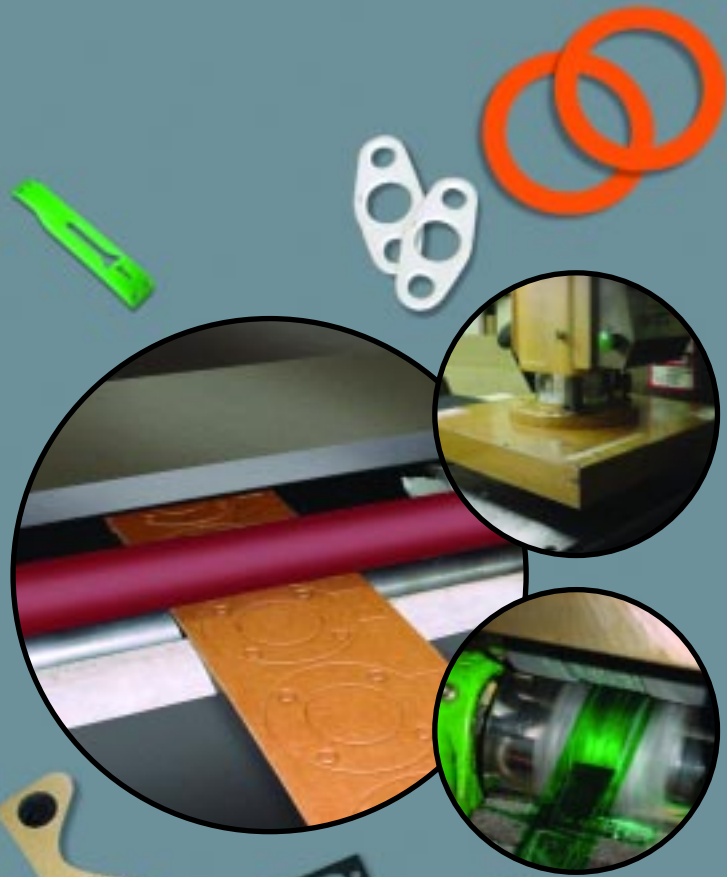

DIE CUTTING

LASER CUTTING

- **TOTAL DIE CUTTING SOLUTIONS: SEMI-AUTOMATIC, AUTOMATIC OR ROTARY... MILLER GASKET IS EQUIPPED TO DELIVER!**

Short, medium and long run capabilities...

Our full service die cutting strategy includes semi-automatic and automatic presses ranging from 15 to 100 ton capacity with bed sizes up to 35" x 63" for die and kiss cutting from both sheet and roll stock. Our ultra-high speed rotary die-cutting equipment can produce high-quality, high-volume, close tolerance parts.

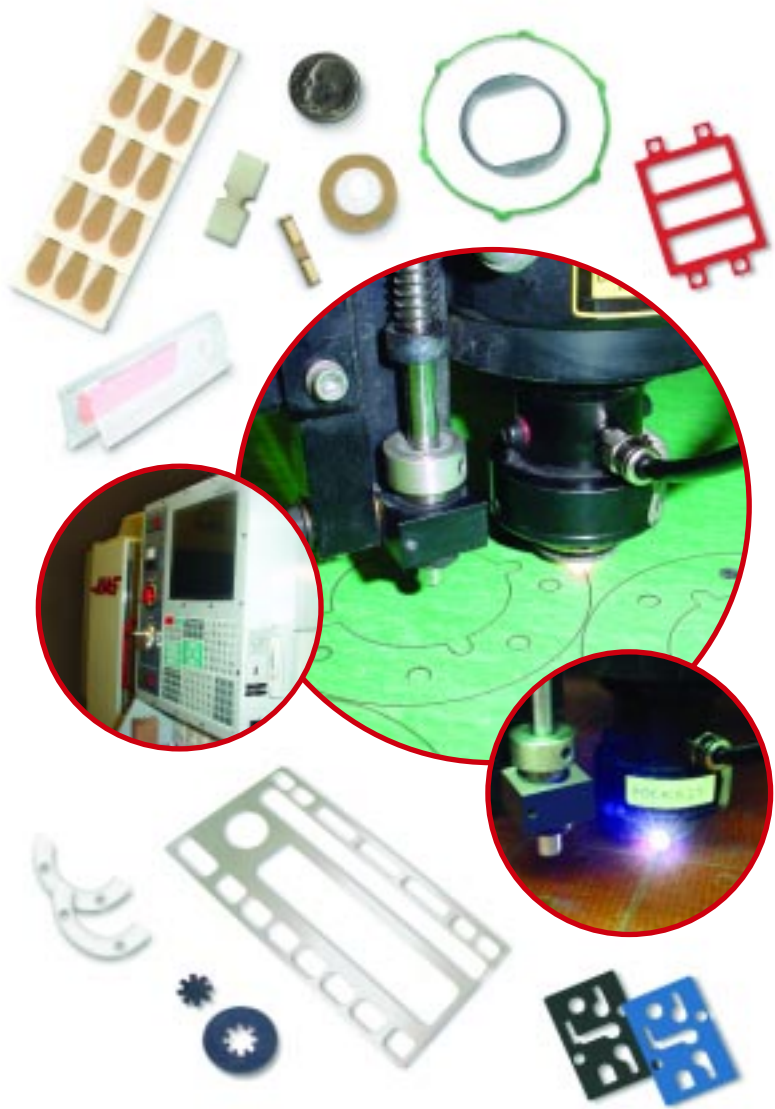

- **PRECISION CNC LASER CUTTING TECHNOLOGY HELPS KEEP US OUT FRONT**

Experience leading edge CNC Laser cutting technology on your next complex prototype or project requiring the precision and intricacy not previously possible with traditional die-cutting processes.

Our prototype and production CNC controlled lasers produce high quality parts 24/7 to meet our customers timely and rigorous part production requirements. We have a series of flexible Laser production manufacturing programs that are aimed at creating partnerships with our customers to help them see that their production and JIT product needs are met.

Our investment and commitment to industry leading technology helps keep us out front.

- **FROM PROTOTYPE THROUGH FINAL PRODUCTION... SINGLE SOURCE MANUFACTURING SOLUTION**

Single-source prototype, product development... We can create finished product from your design file, drawing or reverse engineered actual part. Our integrated manufacturing strategy incorporates a seamless transition from prototype and product development to full-on production manufacturing.

- **CRITICAL MISSION MANUFACTURING: WHEN YOU NEED IT DONE RIGHT... NOW!**

When your complex or time sensitive die or laser cut project has to be done right... trust us to see your project through: on time and in spec. Done right... Right Now!

- **DIVERSE INDUSTRY EXPERIENCE: SPECIALISTS IN MANY... CAPABLE OF SERVING ALL**

Leverage our vast cross-industry experience for your custom die and laser cut product needs. Serving all industries for the last 40 years gives us the knowledge and capability to solve problems and find solutions to your challenging product requirements.

Our specific industry experience includes, but is not limited to; the automotive, electronics component, pump, compressor, high-temperature, speaker, gage, instrument and specialty product marketplace.

Non-gasket die and laser-cut products make up a large part of our business and we pride ourselves on our ability to produce the quality and quantity required on diverse specialty products and applications.

- **INDUSTRIAL GASKET SOLUTIONS**

Utilize our experience in your industrial gasket application regardless of size or temperature required. We can provide a custom solution for your industrial sealing application.

Laser & die-cutting solutions for electronics applications

Die-cut automotive parts since 1961

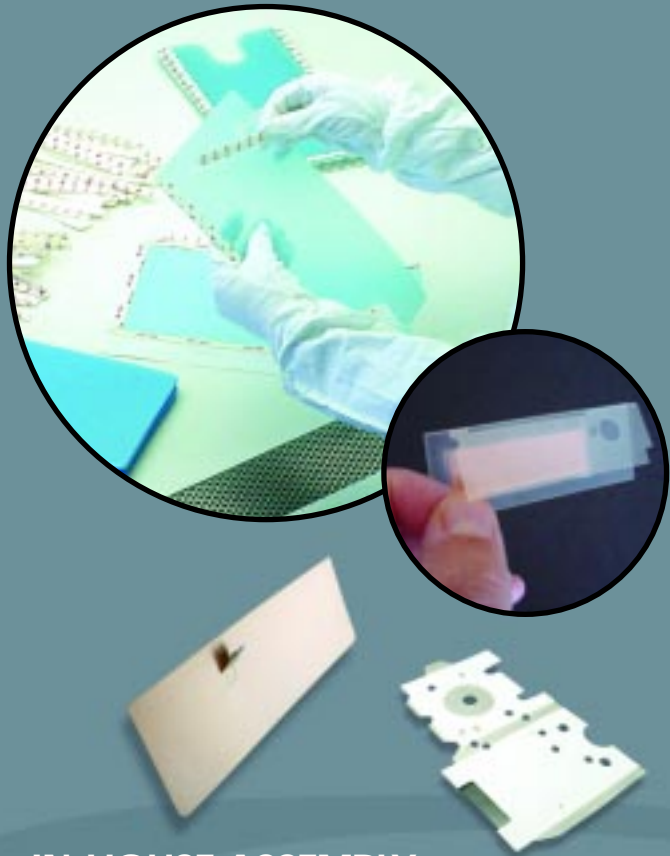

Die-cut products for speaker manufacturing

Gasket and die-cut solutions for high temperature applications

Standard and custom gaskets for industrial sealing applications

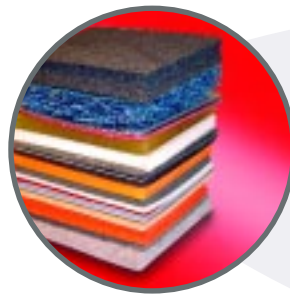

● **IN-HOUSE ASSEMBLY: MILLER GASKET'S RESPONSE TO THE NEED FOR SPECIALTY HAND ASSEMBLED COMPONENTS**

Smart Assembly Service is our response to industry's demand for providing turnkey multi-part assemblies and products requiring secondary services including laser or die-cutting, laminating, and or custom hand assembly.

Whether your project requires prototyping and product development, outside part procurement or 'tight' JIT shipping requirements, we at Miller Gasket are poised and ready and to produce for you.

We believe that persistent follow-through and effective project management are key elements in the successful production of a complex multi-part assembly. We can manage and produce your next hand-assembled project with the same time and attention to detail that you would expect. Let us help you accomplish more with our dedicated and quality-oriented product assembly capabilities.

Total assembled components...Our response to a changing world!

Whatever material your application requires... we can deliver

OUR SUPPLIER PARTNERS

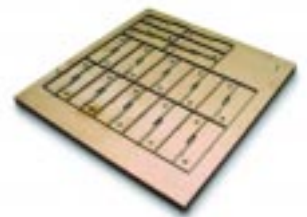

● **MATERIALS AND SOLUTIONS FROM INDUSTRY'S LEADING MANUFACTURERS**

Better materials - better products...It's our long term relationships with industry's leading materials innovators and manufacturers that help us provide our customers with the world's latest and highest quality materials available today. Let us help you improve the quality and durability of all your gasket requirements.

● **ADVANCED IN-HOUSE LASER DIE PRODUCTION... PROVIDING THE QUALITY AND CONTROL NEEDED TODAY**

Quality, control and cost are reasons why we continue to invest in our state-of-the-art in-house laser-cutting die and tooling production facility. Leverage our powerful time saving die production capabilities on your next project. It's all about quality and on-time delivery.

In-house die manufacturing saves our customers time and money
